

Managed Website Service

We protect your margin. And now we manage your website, too.

How would you feel if your restaurant's website was a self-running engine? Our Managed Website Service makes it possible. With this service, we host your website and continually manage it for you. When you want to change the site—swap images, add pages, accept holiday reservations, update your menu—just let our team know. We make the changes for you so you can focus on what matters most—running your restaurant.

- **Lighten your load:** Take tasks off your plate (pun intended).
- **Save time:** Spend it focusing on your food and guests.
- **Rest easy:** Our responsive team handles everything for you.

The Stellar Menus Managed Website Process

ONBOARDING

Your digital mise en place

Consider onboarding your digital mise en place. Like a chef preparing ingredients for a complex dish, we'll gather your requirements and learn your website likes and dislikes so we'll be ready to create your website according to your specifications.

SITE SET-UP

Decor and table settings

Your new or newly migrated site will live on our fast, reliable platform, powered by WIX. During set-up, we'll build or recreate your new site. We'll also integrate your third-party services and optimize your site for mobile devices and search engines.

SITE MAINTENANCE

White glove, 5-star service

When your new site is ready, we'll manage and maintain it. The only thing you need to do is to tell us when to make changes. We handle everything so you can focus on serving your guests.
